solar panel and radio box located on the pole. The communication system will be about 10 square feet. The data link will transmit the information from the Boulder Creek and Upper Huntington Creek stations to the Huntington Power Plant.

Maintenance people would visit the data link site 3-6 times per year. There will be no vehicle access authorized to this site. The purpose of the data link is to provide continuous real time data transmission on stream flows to the Huntington Power Plant at the mouth of Huntington Canyon.

It is anticipated that Categorical Exclusion with a Decision Memo will be used to authorize the installation of these facilities.
